Postcondition 1:	Smart contract Persona created and deployed on blockchain
Messages:	alert message (1): `Wallet do not exists, create or restore one!` alert message (2): `"Registry: Self registry disabled"`

SCENARIOS

```
@Create_Persona
Feature: Create Persona smart contract
In order to I have a account
As a user I want to create my persona smart contract

Background: Sign in with a valid password
    Given  I am at PoP Docs Sign in page
    And  I fill  a valid <Password>
    And  I click in "Sign in"
    And I check Registry smart contract information

    Scenario: create persona smart contract with empty nickname
        When I check Registry smart contract information
        And I see "create-persona" page
        And I click "Create" button
        And nickname field is <empty>
        Then the "Create" button is disabled

    Scenario: create persona smart contract disabled self-registration
        When I check Registry smart contract information
        Then I see a warning <message>
        And I can not proceed

    Scenario: create persona smart contract
        When I check Registry smart contract information
        And I see "create-persona" page
        And I fill "nickname" field with a <nickname>
        And I click "Create" button
        Then I see "dashboard" page
```
