

MUST EXCHANGE

In this manual we will describe the steps for you to use **Must Exchange**.

Summary

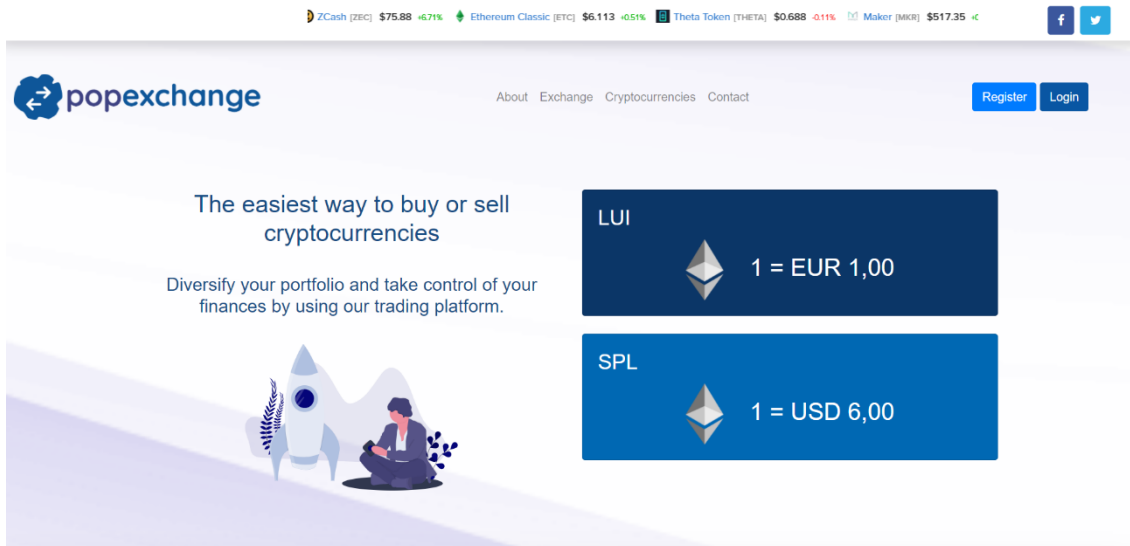

How to create account	2
Application login	4
Must Exchange Dashboard	5
Set up 2FA	6
Change your password	8
Transfer between accounts	9
Balance	10
Buy / Sell	11
Convert	12
Export movement	13

How to create account

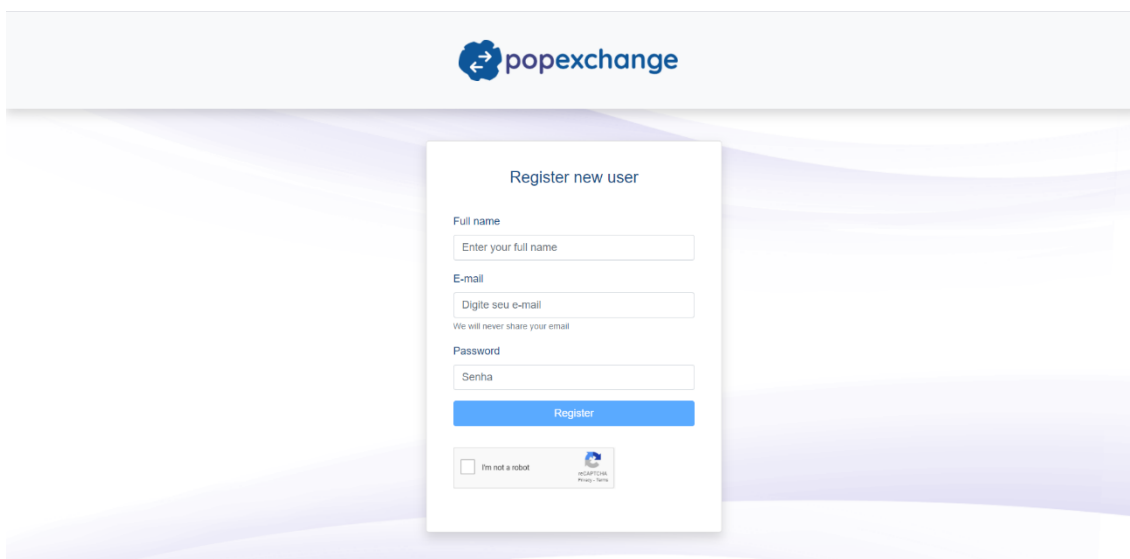

1- Access the Must Exchange Home page with this link:

<https://exchange.Mustblockchain.org/>.

Click the “Register” *button*.

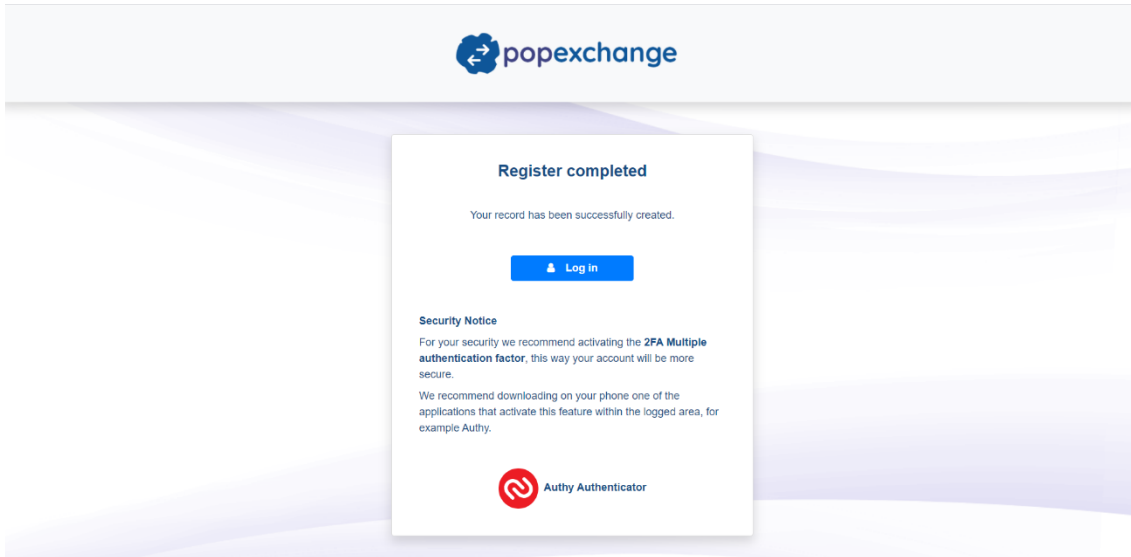

2- To register you need to fill the fields with your **full name**, your **email**, a **password** of 6 to 15 characters and fill the **recaptcha** checkbox. Then you can click “Register” *button*.

3- Great! Your account was created! Now click on the “Log in” *button* to enter your account.

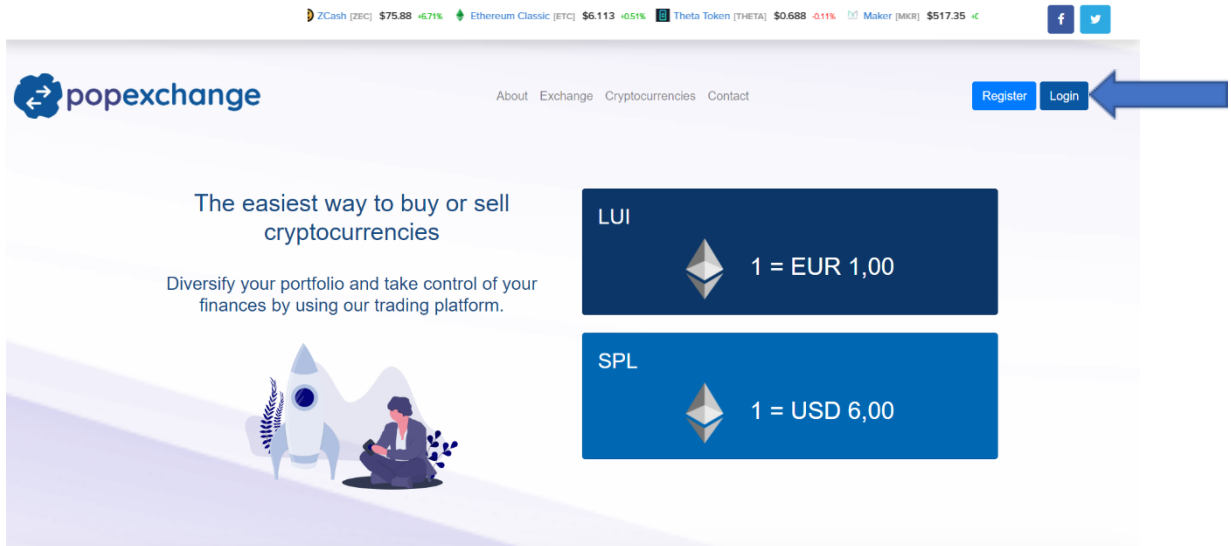

It is necessary to configure 2FA to do transactions on the Must Exchange.

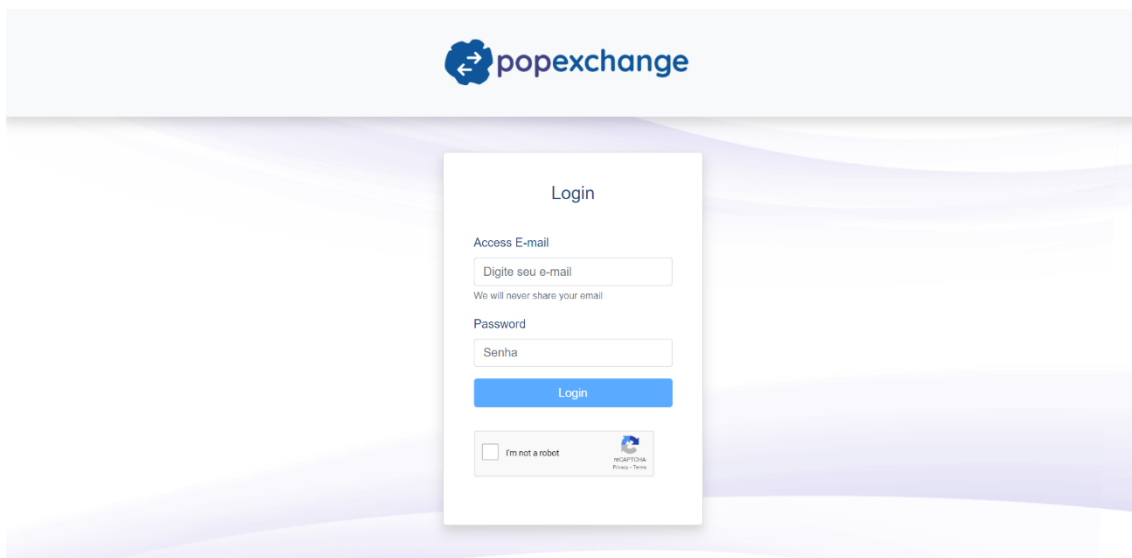

Application login

1- To login, access the Must Exchange home page

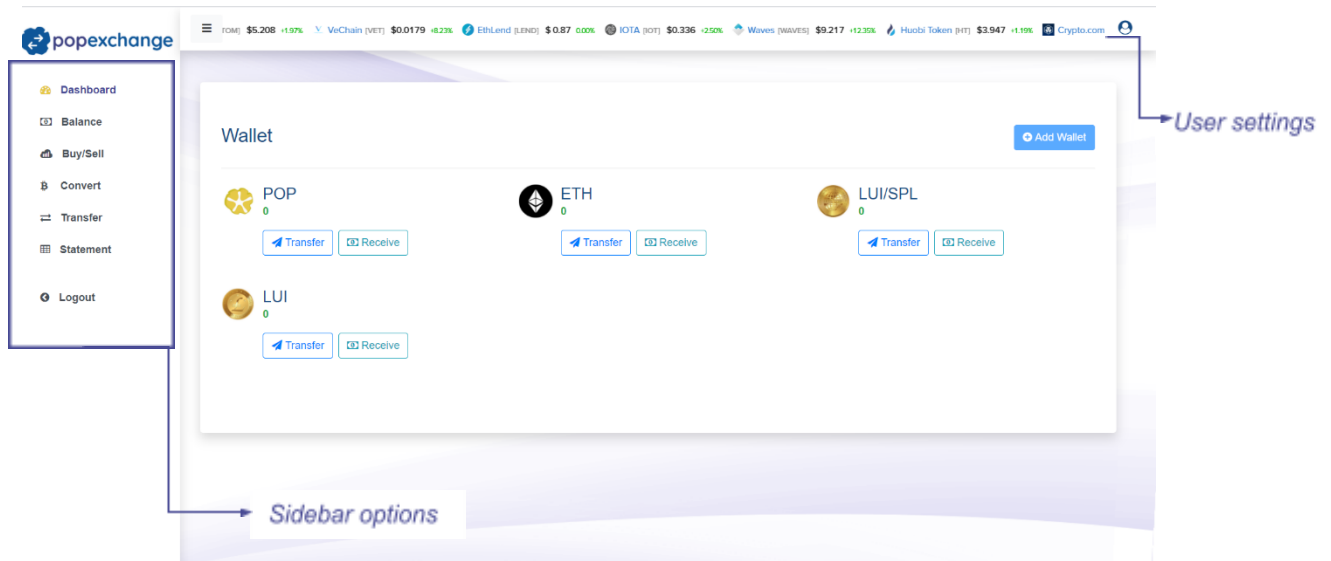

<https://exchange.Mustblockchain.org/> and click the “Login” button.

1- You need the email and password you registered to create your account and fill out the recaptcha checkbox.

Must Exchange Dashboard

On the **dashboard** you can see your wallet balance for each crypto currency that the Must Exchange trades.

Each crypto currency already has a *button* to access the transfer between accounts and the deposit in the wallet.

- The "Receive" *button* displays the QRCode of your wallet address.
- The "Transfer" *button* redirects you to the Transfer sidebar option. Here you can make transfers between accounts using the recipient's email or wallet address.

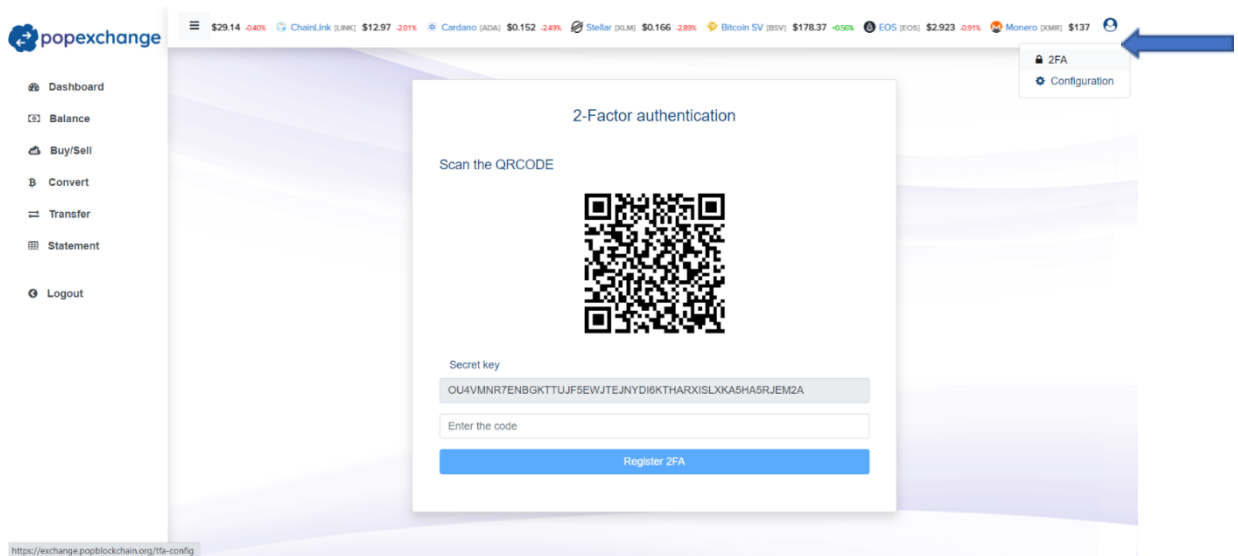

In the **top menu** you have a link to live cryptocurrency prices at <https://coinlib.io/>.

In **user settings** you can change your password and set up 2FA.

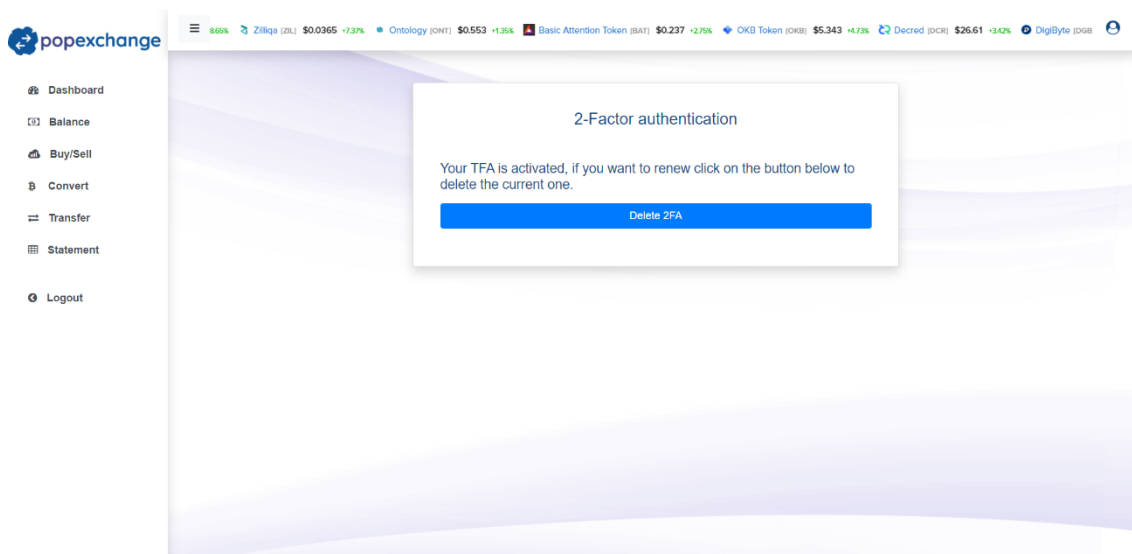

In the **sidebar** are the options for managing your wallet and your crypto currencies.

Set up 2FA

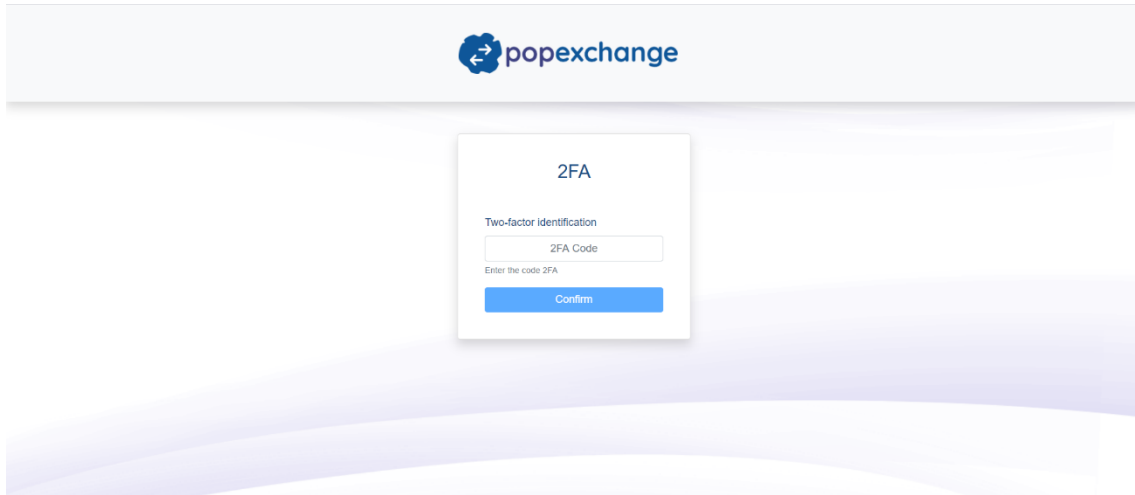

- 1- First you need to download and install an application for two-factor authentication on your phone, for example [Authy](#).
- 2- In Must Exchange, in the top menu click on *user settings* and select the option "2FA"

- 3- In the application installed on your phone, add the Must Exchange account by scanning the QRCode.
Enter the code that displayed to complete the 2FA registration.
Click on the "Register 2FA" *button*.

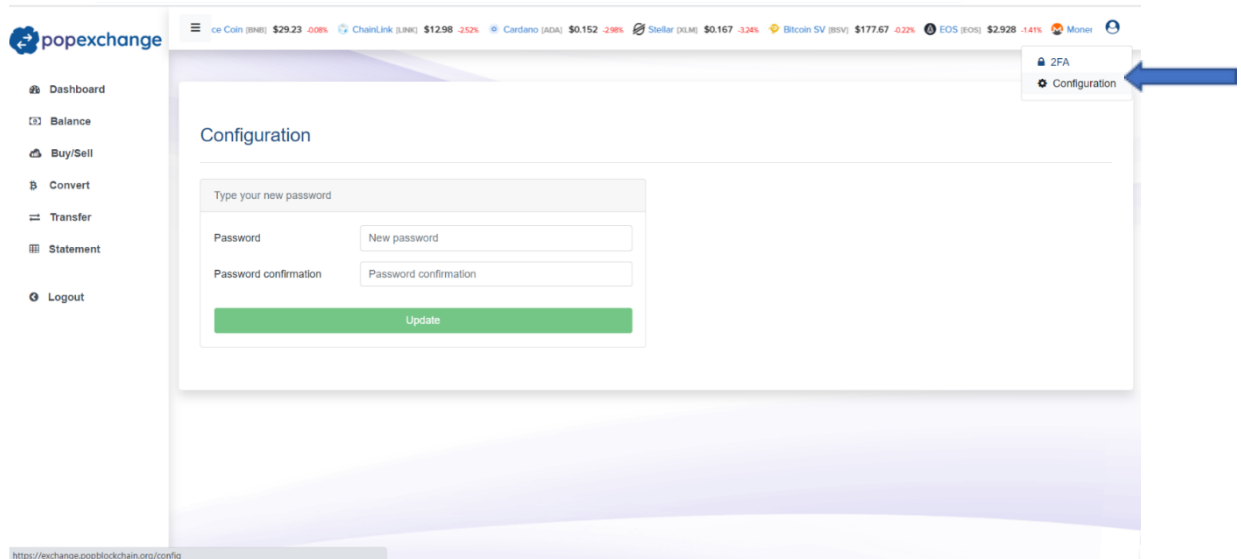

- 4- At your next login you will need to access the two-factor authentication application to log in your Must Exchange account and enter the code.

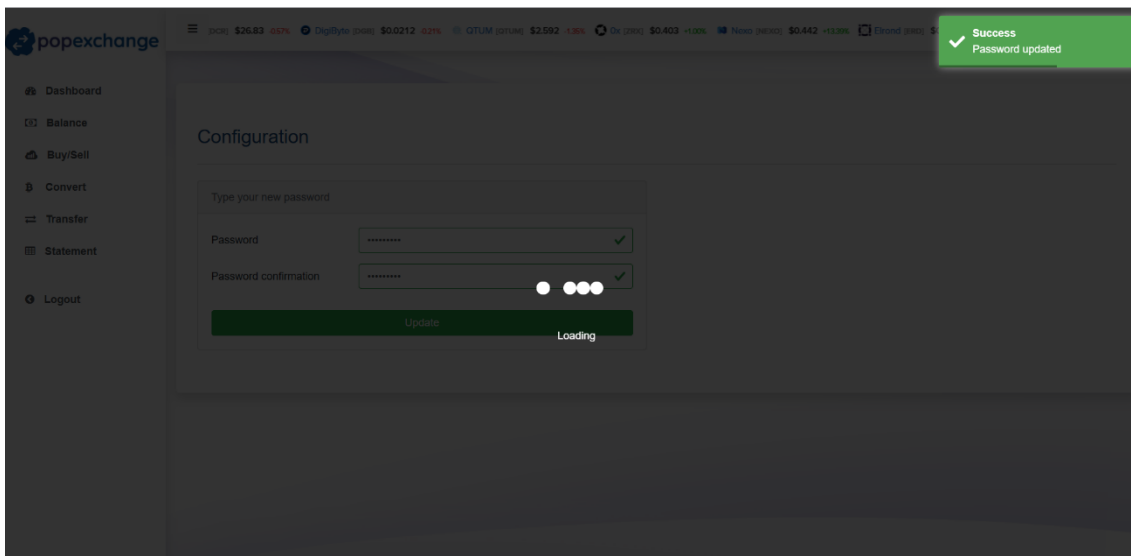

The screenshot shows the popexchange logo at the top. Below it is a white modal window titled "2FA" with the subtitle "Two-factor identification". Inside the modal, there is a text input field labeled "2FA Code" with the placeholder text "Enter the code 2FA". Below the input field is a blue button labeled "Confirm". The background of the page features a light purple and white wavy pattern.

Change your password

- 1- In Must Exchange, in the top menu click on *user settings* and select the option "Configuration"

- 2- Enter a new password and confirm the new password. Click on the "Update" button and a success message will be displayed.
Your password has already been changed. At the next login use the new password.

Transfer between accounts

In the sidebar select the option "Transfer". Here you transfer between other Must Exchange accounts.

- 1- Select the currency. Your balance is displayed.
- 2- The recipient can be searched by email or the address wallet. If the email is not found or the address hash is incorrect, an alert message is displayed in the field.
- 3- Inform the amount to be transferred and click on "Confirm Transfer".

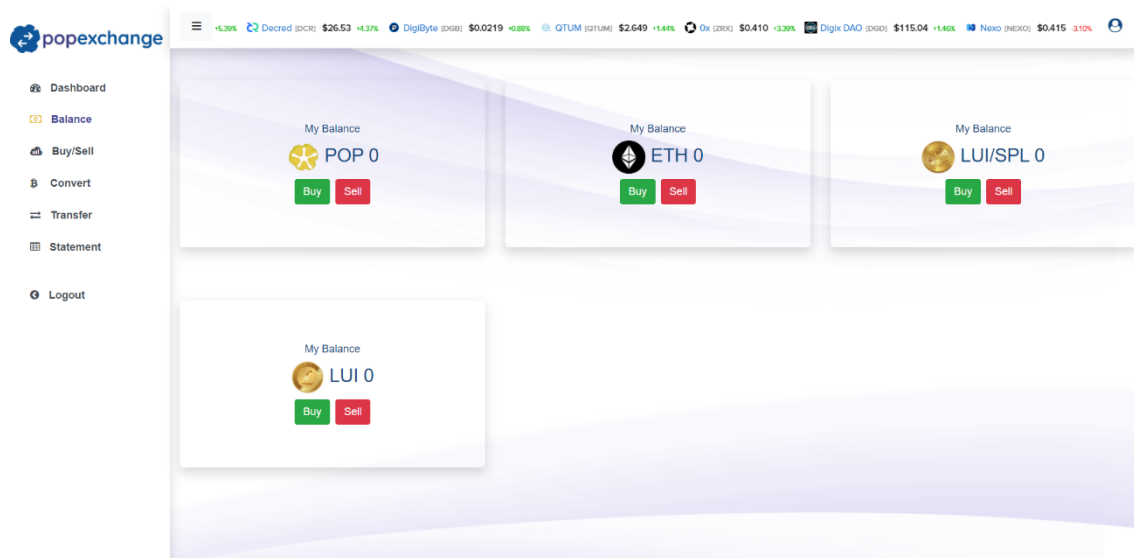

A success message will be displayed.

The screenshot shows the PopExchange website interface for transferring between accounts. The top navigation bar includes a menu icon and a list of cryptocurrencies with their current prices and percentage changes: NEO (\$17.35, -2.55%), VeChain (\$0.0182, +7.17%), Dash (\$101.61, -0.38%), Cosmos (\$5.081, -2.10%), EriLend (\$0.87, 0.00%), and Waves (\$9.066, +5.67%). The left sidebar contains navigation links: Dashboard, Balance, Buy/Sell, Convert, Transfer (highlighted), Statement, and Logout. The main content area is titled "Transfer between accounts" and contains a form with the following fields: "Select the currency to transfer" (a dropdown menu showing "POP" with a balance of 0), "Recipient" (a text input field containing "dafanjos@hotmail.com" with a green checkmark), "Wallet address" (a text input field containing "0xBc10137CD5c7682A13D206E65b4bAA406d3a1d5" with a green checkmark), and "Amount" (a text input field containing "\$ B 100" with a green checkmark). Below the form is a green "Confirm Transfer" button. To the right of the form, there is an "ATTENTION" section with a warning icon and text: "Cryptocurrency submissions cannot be canceled." and "Did you know that you do not pay transfer fees to PoP Exchange addresses? Ah, the transfer is also immediate!". Below this is a "FEES" section with a warning icon and text: "Transfer rate 0.0%". The URL in the browser's address bar is "https://exchange.popblockchain.org/transfer".

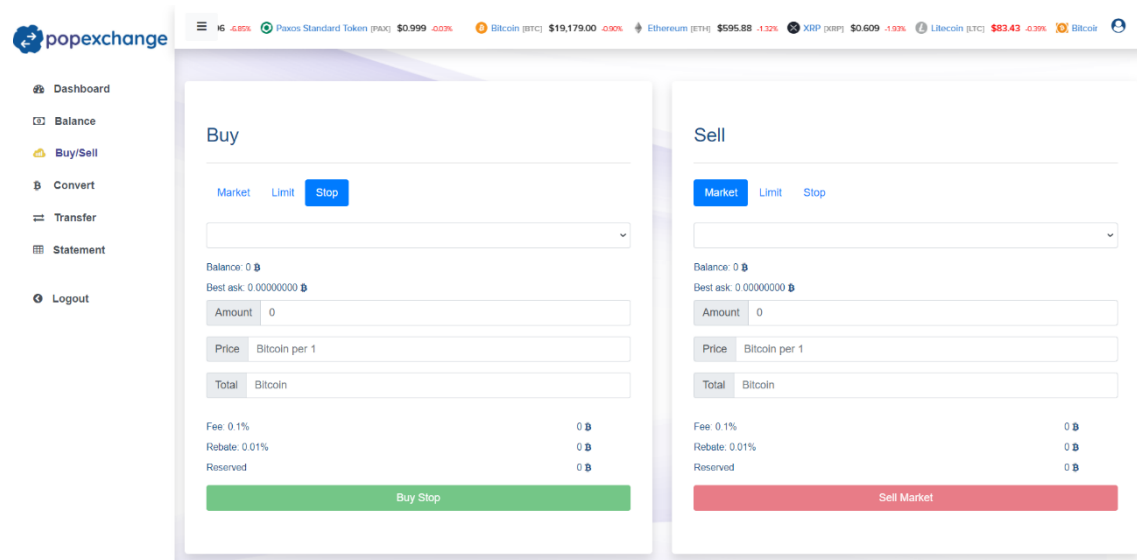

Balance

This section displays your balance separated by currency type.

To facilitate access, the user uses the balance of his currency to make the purchase of other currencies. (At this moment the user can deposit ETH and buy the other currencies available in the balance)

Buy / Sell (Order Book)

Here you define your trades. For now, the Book functionality **will not be active**.

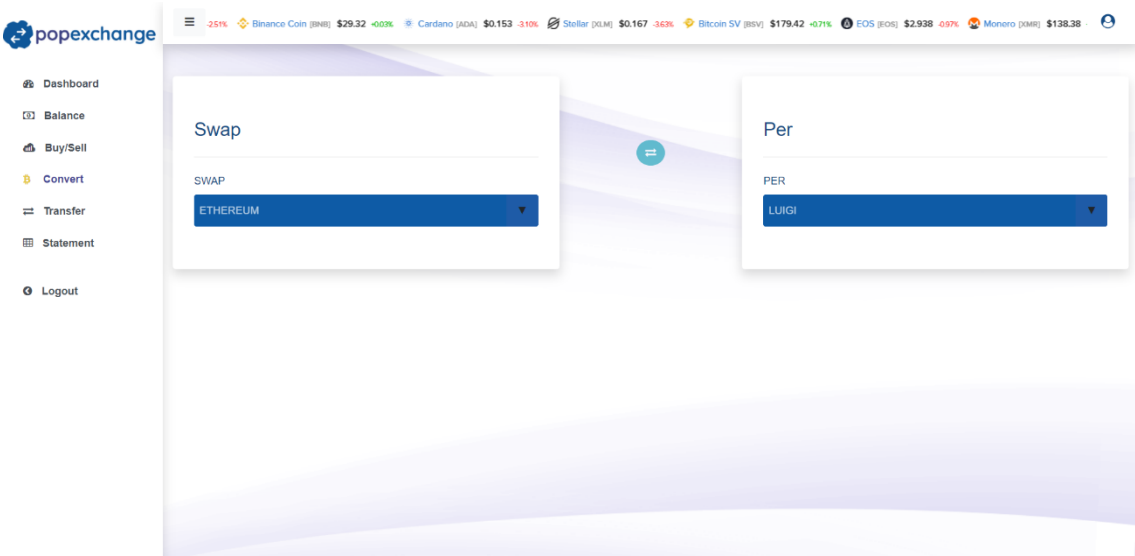

For other currencies such as BTC, DAI and others, trades using the Order Book will be available.

We provide the creation of:

- Limit orders - allow you to create orders with a specific price and will only be executed if the market reaches its Limit Price.
- Market Orders - your orders will be immediately executed according to the best available price.
- Stop-Limit Order - will be executed at a specific price after the Stop Price is reached.

Convert

This section is intended for currency conversion, but it is not yet available for use at that time.

Export movement

To export all your account transactions, use the "Statement" sidebar option.

Your movements are displayed on the screen. Select the type of document you want to download. (.pdf; .csv; .xlsx; .png; .txt; .json)
