VALUE PROPOSITION

As a	user
I want	add more tokens to the list
So that	I need a way to inform the token address

ACCEPTANCE CRITERIA

- User can add tokens by creating a private list
- Only tokens PoP20 (**ERC20**) can be added
- Added tokens will be displayed right after the tokens defined in the setup token list
- The user can delete a token added to his private list

SCENARIOS

@add_token

Feature: Add tokens ERC20

In order I have more types of tokens ERC20
As a user I want to see all tokens in my wallet

Background:

Given I am signin my wallet account
And I selected add new token button
And a I see add Token page

Scenario: Add token a valid ContractAddress ERC20

When I fill the fiel <ContractAddress>
And I click "add token" button
Then I see my token in the list tokens

Scenario: Add token a invalid ContractAddress ERC20

When I fill the field with invalid <ContractAddress>
Then I see a warning message
And I can not click "add token" button
